Guarded *XcessPro*

On-Demand Access Management Software
for Nomadix™

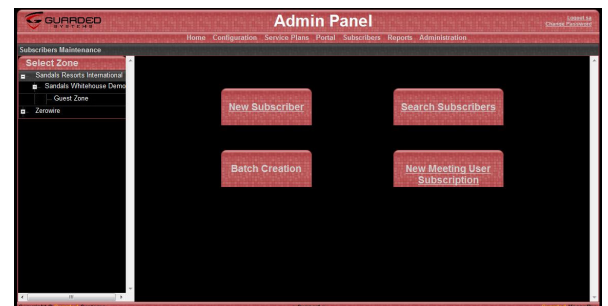

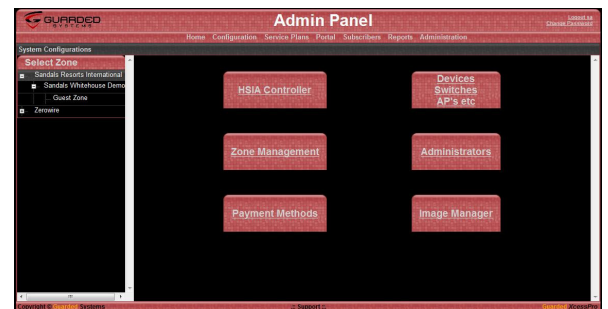

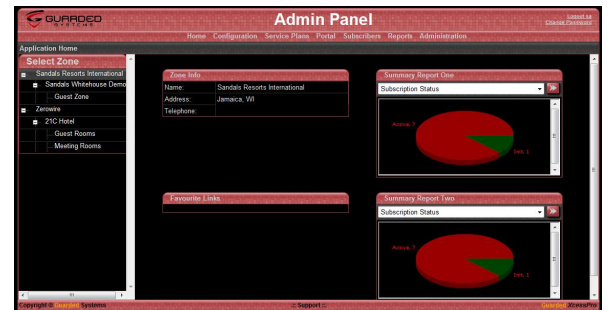

A powerful web-based application that performs the back-office tasks necessary to operate and manage Nomadix Public Internet Access

About Guarded XcessPro

Guarded XcessPro is a vibrant, extremely economical, on-demand software platform for user management, branding and access control for hospitality, education, WISP and other public internet access systems. Guarded XcessPro is designed to service various industries and address the individual needs of the customers and the managers of specific industries. It offers unprecedented flexibility and options in the management and control of the facility's (hotel/motel/casino/airport/coffee shop/dormitory/etc.) wireless or wired guest Internet networks –the unique hierarchical design and function of our software can be used by a single location or a multi-brand chain, with the ability to roam in between.

Salient functional attributes of Guarded XcessPro:

- Promotes corporate identity and brand management through customization
- Enables organization through an intuitive interface designed for ease of use by non-technical staff
- Allows granular administrative control through customizable role of every administrator
- Allows clients/guests to roam between wired and wireless networks and can (optionally) prevent guest room users from gaining free access to meeting rooms, board rooms and restaurants/other areas
- Simplifies billing by providing an easy-to-use sign on process for property management system (PMS) for guests and non-guests
- Increases efficiency of managing business accounts, using the full-featured conference and meeting internet access planner and accounting /usage reports
- Enhances property image by superior customer experience
- Maintains internal security and access policies for application access and usability by your employees, managers and accountants
- Track revenues, usage and performance with custom reports and graphs in real time
- **Cost-Effective:** Subscription substantially lower than any other comparable software in the market

About Guarded Systems

Guarded Systems was formed to address the need for next generation IT solutions. Guarded Systems is a technology driven company, based out of Greater Atlanta, with over 250 hospitality, enterprise and government clients across the United States and overseas.

Our team brings years of rich information technology, telecom and wireless security experience under one umbrella. Our solutions utilize the cutting-edge technology and proven methodologies, while maintaining the uptime, availability and scalability required meeting the needs of today's business community.

Some of our Milestones!

- Our engineers have designed two ISP's from ground level and a CLEC.
- Our engineers have designed multiple Class 4 Data Centers for mission critical applications.
- Our engineers were the first to design and deploy wireless 25MB point to multipoint links in Central Florida for wireless using licensed spectrum.
- Our engineers designed and deployed FIP-140-2 complaint network for Naval Medical
